

Aritra Das

✉ aritradas405@gmail.com —  aritra-das-a180b4251 —  Aritrraa

Summary — Passionate AI/ML Enthusiast with strong interest in NLP, Deep Learning, LLMs, Generative AI, RAG, and LangGraph, with hands-on experience in CodeBERT, Semantic Search, Real-Time Systems, and Intelligent Automation. Proficient in Python with working knowledge of TensorFlow, PyTorch, and Flask, and a solid foundation in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and SQL.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar

2022 - Present

B.Tech in Computer Science and Engineering

CGPA : 8.59

Asian International School, Howrah

2020 - 2022

Intermediate, CBSE

Percentage: 80%

Asian International School, Howrah

2020

Matriculate, CBSE

Percentage: 86%

Skills

Prog. Languages: C, Java, Python, HTML, CSS, Advanced SQL, SAP ABAP

Lib/Frameworks: NumPy, Pandas, scikit-learn, Matplotlib, Pylint, Flask, PyTorch, TensorFlow

AI/ML Skills: NLP, CodeBERT, Generative AI, CNN, Deep Learning, LLM, RAG, LangGraph

Relevant Coursework: DSA, OOP, DBMS, CN, ML, AI, Statistics

Tools: Python/Jupyter Notebook, Git/GitHub, API Integration, Render, Colab, Microsoft Excel

Languages: English (Professional Working Proficiency), Hindi (Native/Bilingual), Bengali (Native/Bilingual)

Projects

BookIQ: Semantic Book Search Engine ([GitHub](#))

2026

- Built a Full-Stack AI Web Application using React and Django, featuring Automated Web Scraping, AI-Generated Book Summaries, and Content Categorization.
- Engineered LangGraph and RAG Pipelines, leveraging ChromaDB and Groq LLM for High-Accuracy Conversational Semantic Search.
- Designed a Dual-Database Architecture using SQLite and a Local Vector Database for Fast Semantic Text Retrieval.

VoiceXChange - Real-Time AI Speech Translator ([GitHub](#)) ([Live Website](#))

2025

- Developed a real-time voice translation app using Flask, AssemblyAI, Google Translate API, and gTTS, supporting 9 languages.
- Built a responsive UI with HTML/CSS/JS, using MediaRecorder and Web Audio API for live voice capture and playback.
- Deployed on Render with secure API integration and documented the full setup and features.

Machine Learning-based Code Review System ([GitHub](#))

2025

- Used CodeBERT embeddings and logistic regression to classify Python code quality effectively.
- Integrated Pylint for automated static code checks; developed a Flask-based review interface.
- **Tech Stack:** Python, Flask, scikit-learn, Pandas, NumPy, Pylint, CodeBERT

Experience

Baby Dino/Zenith India ↔

June - August 2025

Artificial Intelligence Intern

- Trained and fine-tuned NLP and transformer-based models using Python, PyTorch, Hugging Face, RAG, and LangGraph for automation, search, chatbot applications, and generating data-driven insights.
- Managed large datasets, performed data cleaning, web scraping and preparation to improve model training and overall performance, while ensuring teamwork and timely delivery.
- Collaborated with team members to combine data from multiple sources, train models, and integrate them for AI chatbot development.

Leadership & Activities

- **2023:** Youth Red Cross, KIIT – Led 4+ events showcasing strong leadership and coordination skills.
- **2024:** KIIT Film Society – Boosted engagement through creative social media campaigns.
